

International Medical Humanitarian Organisation

Médecins Sans Frontières (MSF)

Presentations at the 43rd Union World Conference on Lung Health

Wed. 14th Nov

- **9:00 – 12:30, Room: 409 (Workshop)**
 - Preventing child deaths from drug resistant tuberculosis

Thur. 15th Nov

- **10:15 – 11:15, Hall 4 (Poster Discussion Sessions)**
 - Session 1: Evaluation of a novel concentration method for the microscopic detection of Mycobacterium tuberculosis from induced sputum
 - Session 3: Discordance between the Hain MTBDRplus® assay and MGIT® culture in a highly drug-resistant population
 - Session 10: Hepatic tolerance among HIV-TB co-infected patients treated with ARV and anti-tuberculosis drugs in a setting with high prevalence of HBV infection
 - Session 12: Child and adolescent DR-TB case notification following a phased implementation of a paediatric TB project in Tajikistan
 - Session 15: Factors associated with treatment default among drug resistant tuberculosis patients in Yerevan, Armenia
 - Session 15: Analysis of the outcomes from use of second-line drugs for the treatment of isoniazid-resistant, rifampicin-susceptible TB in Karakalpakstan, Uzbekistan
- **12:45 – 14:15, Banquet Hall (Oral Abstract Session)**
 - Session 3: Pharmacokinetics of Rifampicin and Isoniazid in TB-HIV co-infected patients on Nevirapine or Efavirenz based antiretroviral treatment (ANRS12214)
- **14:30 – 16:30, Room 401 + 402 (Symposium)**
 - Tuberculosis in prisons: breaking the cycle through integration with community health services

Fri. 16th Nov

- **8:00 – 10:00, Conference Hall 3 (Symposium)**
 - Advancing molecular diagnosis with a sustainable approach to impact patient care

- **8:00 – 10:00, Room 401 + 402 (Symposium)**
 - NGO and civil societies' role in sustainable approaches for scaling up DR-TB programmes
- **10:15 – 11:15, Hall 4 (Poster discussion Session)**
 - Session 34: Improved survival among HIV-infected MDR-TB patients diagnosed and treated in a community-based programme in Khayelitsha, South Africa
- **12:45 – 14:15, Plenary Theatre (Oral Abstract Session)**
 - Session 8: Risk of death during TB treatment in paediatric TB cases in Médecins Sans Frontières TB/HIV projects in Africa and Asia

Sat. 17th Nov

- **10:15 – 12:15, Conference Hall 1 (Symposium)**
 - Palliative care in drug-resistant and complicated tuberculosis: models of community-based care
- **12:30 – 13:30, Hall 4 (Poster Discussion Sessions)**
 - Session 37: Molecular epidemiology of tuberculosis in Swaziland
 - Session 45: Adverse events among HIV and MDR-TB co-infected patients receiving antiretroviral and second-line anti-tuberculosis treatment in Mumbai, India
 - Session 50: A decentralised community-based MDR-TB model of care in Northern Uganda
- **12:30 – 13:30, Conference Hall 3 (Oral Abstract Sessions)**
 - Session 15: Mortality among HIV-infected adults presenting for antiretroviral therapy with unexplained weight loss, chronic fever or chronic diarrhoea in Malawi
 - Session 15: Survival in HIV-tuberculosis co-infected patients at 48 weeks after starting antiretroviral therapy: CARINEMO trial ANRS 12146
- **14:45 – 15:00, Banquet Hall, The Union/CDC Late-breaker sessions**
 - Are the WHO targets for mortality and default realistic? Outcomes of 40510 patients from 22 TB treatment sites in Africa and Asia
